Maybe some interference on the CAT5e wiring? No, it was not certified when installed.. I've done numerous installs and terminations without true wire certifications Also have DSCP setup, and wireshark shows its working.

Shows a bogus IP address of 129 0 0 10 pointing to our IP-PBX Satellite office hardware: Cisco SG300-52 MikroTik 1100ahx2 (same as main site) connection: Copper (Brighthouse) 100/10 main site: 250/25 i'm scratching my head here.. This is applied on the switches Would this something to do with QoS of the VOIP call coming over the Isec tunnel? I've done installs before outside of this office, and never experienced such issue with voip calls over ipsec tunnel.. 59ms So, leads me to believe a copper circuit issue I do know, that when brighthouse installed the coax.

I've seen that as well Animation art johnny quest software headquarters I would blame faulty handset if was only a single user or such.. This has ipsec site-2-site tunnel back to our main office which has Onsite PBX Server.. End users can hear it QoS is setup on both sides Ran wireshark -- all looks good, except do see some items for 'BAD UDP LENGTH > IP PAYLOAD LENGTH'.. Primary office = no issues or complaints about phone quality Remote office Users are complaining about static on the line or crackling sound..
